Re: Ross Kopi - Wild Luwak Authenticity

To whom it may concern

We first met Matthew Ross in September 2013 in Belgium. It soon became clear that Matthew and his team were doing amazing work in Gayo, Sumatra with Kopi Luwak. From that first meeting we have been in correspondence with Matthew on a range of topics concerning Kopi Luwak production.

Our working relationship has included much detail about coffee and production techniques, challenges and solutions. Throughout all dealings we have found Matthew to be professional, clear and very knowledgeable. Following our work together on the subject of Kopi Luwak production in Indonesia we invited Matthew to be the keynote speak at the Indonesian International Coffee Symposium in Aceh, November 2014. We regard Matthew to be the leading authority on the production of sustainable wild Kopi Luwak.

This year the embassy will work closely with Matthew in an advisory role for numerous upcoming global coffee events. Our cooperation is symbolic of Matthew's passion and understanding for Indonesian coffee and culture.

Supplementary to other documentation, we trust that Matthew and his new company Ross Kopi will only produce true wild luwak coffee from the Gayo Highland region of Northern Sumatra. We look forward to working with Ross Kopi this year and in the future.

Best Regards
